A66 T

Poor hygiene in wind instruments poses serious health risks for musicians. A study by the ACAAI confirmed « Saxophone Lung », an allergic lung disease resulting from fungus growth in poorly cleaned instruments.

Research at Tufts University discovered various germs, including tuberculosis, in 20 inadequately maintained wind instruments.

Maintaining instrument cleanliness is crucial for musicians' health and performance reliability. BG swabs are crafted and inspected in France three times to ensure optimal quality.

Lint free. No chemical additives. Washable at 30°C / 86°F.
